

tmux — panes & windows

prefix is `^` `Space` · i j k l = `↑` `←` `↓` `→`

PANES — inside one window

Split side-by-side

`^Space` then `\` or `\`

Split stacked

`^Space` then `-`

Focus left / down / up / right

`^Space` then `j` `k` `i` `l`

Resize (repeatable *)

`^Space` then `^j` `^k` `^i` `^l`

Close pane

`^Space` then `x` or `exit`

WINDOWS — the tabs in your status bar

New window

`\c` or `^Space` then `c`

Jump to window 1–9

`\1` ... `\9`

Next / previous

`\f→` `\f←`

* Resize is `bind -r` — after the first `^Space` `^l`, keep tapping `^l` without the prefix.

! Bare `\-` is swallowed by AeroSpace (window resize) — always use the prefix for a stacked split.

↑ New panes & windows inherit the current directory.
